

10 October 1957

MEMORANDUM FOR: Chief, Logistics

THRU : Chief, Management Staff

SUBJECT : Justification for Additional Thermo-Fax Machine.

REF

1. The Cable Section of this Division requires a Model 17 H Thermo-Fax Machine to replace the "Photostat Instant Copier" Machine now considered obsolete for copying cables and telegrams. Cables from certain sources, formerly printed by "ditto" are now printed with the kind of ink that will reproduce by the Thermo-Fax Process.

2. The Cable Section is presently receiving  non-CIA cables and telegrams each month which must be disseminated to the various interested CIA offices on a strictly current basis. A large number of these cables and telegrams must be reproduced in order to make appropriate dissemination. The reproduction volume is greater than one Thermo-Fax Machine can handle on a current basis.

3. This second Thermo-Fax Machine for the Cable Section was included in the approved budget for Fiscal 1958.
